

Creating Accounts:

As educators and students from across the state will be in the Keystone Commons system, there is a great need to establish accounts using a protocol. Please adhere to this so that we can serve our students better. Any account that does not follow this protocol is in danger of being deleted. I really appreciate your help in this manner.

Ann M. Johnston

- * You are welcome to use all lowercase and a hyphen instead of capital letters and an underscore. You may also alter the order of names and include middle initials if that is the way other accounts are set up for your district.
- * Teachers are expected to use their first and last name for their display name when registering, so the above protocol will be for their username. Students do not need to use their real names, so the above can be used for their display name and username in the registration. No email is required for students.

Group protocol: In order to manage our groups, tag each created group with your district initials and IU12. Example: BSSD and IU12 for groups created at Bermudian Springs.
